HOSPITAL INFECTION CONTROL COMMITTEE

ROLE OF THE COMMITTEE:

- To develop a system of identifying, reporting, investigating and tracking hospital acquired Infection.
- To formulate policies and guidelines to control hospital acquired Infection.
- To educate the healthcare workers of the hospital on the Infection Control policies and procedures.
- Regular training taken for nurses, nursing students and housekeeping staff bedside and weekly classes taken by Infection control team members for nurses.
- To ensure optimum disinfection and sterilization and oversee the segregation and proper disposal of biomedical waste.
- To carry out continued surveillance of hospital infection with reference to hand hygiene, surgical site infections, ventilator associated pneumonia and device-related infections.
- To monitor the rational usage of antibiotics.
- To monitor the trends of hospital infection and therefore detect any impending outbreak early.
- The Committee shall meet every month unless circumstances force a change of date.
- The minutes of the meeting are recorded and implementation of action is monitored.
